JAI SURYA J

Frontend Developer (React.js | Next.js)

Chennai, India | +91 6369391891 | jayasurya0713@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building responsive, high-performance web applications using React.js, Next.js, Redux Toolkit, and Material UI. Delivered 4+ production platforms spanning AI-powered hiring, real-time chat, and e-commerce, integrating REST APIs, WebSockets, and payment gateways (Razorpay, Stripe). Skilled at translating complex product requirements into scalable, reusable UI architecture in Agile teams.

SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Next.js, Redux Toolkit, Context API, HTML5, CSS3, Material UI

APIs & Real-Time: REST APIs, WebSockets, Socket.io, Payment Gateway Integration (Razorpay, Stripe)

Auth & Security: JWT, OAuth, Protected Routes & Session Management

Tools & Platforms: Git, GitLab, Bitbucket, Postman, AWS (EC2), Hostinger, PuTTY, Figma, Zoho Sprints, Asana

Practices: Agile/Scrum, Code Reviews, Performance Optimization, Component-Driven Architecture

WORK EXPERIENCE

Frontend Developer | Apzzo Technologies Private Limited, Chennai, India

March 2024 – May 2026

- Built and shipped **6+ production features** across web applications using React.js, Next.js, Redux Toolkit, and Material UI, owning delivery from design handoff through deployment.
- Improved frontend performance by **~30%** (reduced re-renders and load time) through optimized component structure, memoization, and reusable UI patterns.
- Led code reviews for a team of **3 developers**, establishing consistent coding standards and mentoring junior developers on React best practices.
- Delivered features on time across **multiple Agile sprint cycles**, collaborating with UI/UX designers and using Zoho Sprints/Asana for tracking, Postman for API testing.
- Deployed and managed applications on **AWS (EC2) and Hostinger**, using PuTTY for server access and Git for version control.

PROJECTS

Effect-AI – HireManage (B2B AI Hiring Platform)

- Developed a multi-tenant, AI-powered hiring platform with role-based access for Super Admin and Hiring Manager roles.
- Designed a structured 4-step hiring workflow (JD Upload → SkillDNA Generation → Interview Plan → Interview Guide), reducing manual hiring steps.
- Integrated AI APIs for resume parsing, candidate-role matching, and fit scoring across **100+ candidate profiles** per role.
- Built scalable, responsive UI with React.js, Redux Toolkit, Next.js, and Material UI covering the full candidate lifecycle: screening, shortlisting, interview tracking, and hiring, with real-time WebSocket-based evaluation updates.

Candidate Resume Fit Platform (B2C)

- Built an AI-powered resume-to-job matching platform using React.js, Next.js, Context API, and REST APIs.
- Implemented resume upload, job-role targeting, and automated AI-based fit analysis end-to-end.
- Integrated AI APIs for resume parsing, skill extraction, semantic matching, and compatibility scoring, surfaced via dashboards showing skill-gap analysis and match percentage.
- Designed a responsive, performance-optimized UI with Material UI and a scalable component architecture.

Ecademictube – Real-Time Chat Application

- Built a scalable real-time chat UI with React.js and Redux Toolkit using component-based architecture.
- Integrated Socket.io for real-time messaging, typing indicators, and online/offline presence updates.
- Implemented JWT-based authentication with protected routes, optimized rendering for large chat histories with virtualized lists and lazy loading, and built reusable UI components with Material UI.

EDUCATION

Dhanalakshmi Srinivasan Engineering College | *2020 – 2023*

Bachelor of Engineering (BE), Mechanical Engineering — CGPA: 7.05
